

# Registration 2006

Fall Conference  
Tacoma, WA  
September 25 - 28, 2006

**“Greater Efficiencies thru  
Timely Maintenance of Roads”**

# 2006 Fall NWPMA Conference

The City of Tacoma, WA and Pierce County invites you and your staff to the **NWPMA Fall Conference**. Hosted at the Greater Tacoma Convention & Trade Center in beautiful downtown Tacoma.

As always we offer a two-tier registration so you can bring more employees from your agency. Registration provides four days of conference interaction and includes the pre-conference training, some meals included.

Come share ideas and build business relationships with pavement management and street maintenance professionals from around the Northwest. Over 25 technical sessions and programs offered. Receive hands on pavement management and computer training in our onsite lab. Discover new products or services with any of our vendors at break time in the vendor ballroom.

Take home the very best pavement management has to offer in 2006

**See you there....The NWPMA Executive Board**

## Save these dates : September 25 - 28, 2006

User Group Training and remaining sessions are filling fast...

The lab will have 12 workstations and each sessions offers 1½ hour of training. This is why we also offer walk-in times and extended hours for one-on-one training, demos and software exploration.

## **Pre-Conference Workshops: Included in the cost of the Full and 2-Tier Registration**

### **Workshop #1 - Monday 9:00 AM - 4:30 PM**

**Alan Curtis, President of CHEC Consultants**

#### **Effective Pavement Maintenance and Rehabilitation**

Mr. Curtis has been involved in pavement design, maintenance and engineering for over 30 years and has been instrumental in development and use of innovations such as inter-layers, rubberized asphalt, open graded asphalt and other aspects of pavement maintenance and rehabilitation.

This all day seminar will begin with understanding defects so that we better choose the right maintenance or rehabilitation. Throughout the seminar, Mr. Curtis will discuss in depth the following: crack sealing, trench restoration, patch repairs, asphalt materials for maintenance, overlays and paving principles, the importance of compaction of AC for longer pavement life, use and misuse of interlayer, spray applied patching and principles of Pavement Management Systems to close the communication gap between management and road managers.

Mr. Curtis regularly speaks at the National Pavement Maintenance Conventions as well as Continuing Education. classes for various universities across the country. This class promises to be a fun and educational experience.

### **Workshop #2 - Monday 9:00 AM - 4:30 PM**

**Chris Ott, City of Tacoma & Jeff Rudolph, Pierce County  
Regional Road Maintenance ESA Program - Track 3**

This course is designed for maintenance crew supervisors, crew leaders, and field workers. Participants will leave with a better understanding of the federal Endangered Species Act, salmon biology and habitat requirements, erosion and sediment control concepts, and the ability to implement the Regional Program while performing maintenance activities.

#### **#2 Optional Section - Friday (Sept. 29th) 9:00 AM - 4:30 PM**

##### **Regional Road Maintenance ESA Program - Track 3F\***

Track 3F provides field training where you, install and test a variety of BMPs. Participants are divided into teams and work with silt fences, check dams, mulches, matting and live staking. Then BMP's are tested with water to simulate actual conditions that would be encountered in the field. The NWPMA has made special arrangements to host this training off-site at Pierce County's Lakewood Pit. Completion of this course, when combined with the Track 3 course curriculum listed above, satisfies the Washington State Department of Ecology's Certified Erosion and Sediment Control Lead (CESCL) training requirement.

\*Please remember to bring work clothes when taking this section of the course. This portion is optional and fulfills CESCL training.
